

SOLO HELP SHEET

- The Green decked Solo is in berth 190 with a dark blue cover
- The Blue decked Solo is in berth 191 with a lighter blue cover
- There are four Solo sails in the boat-shed. 2 are in better condition and are intended for racing use only
- The rudders and tillers are stored in the boats

Before launching

- Check all the bungs are in and inspection hatches closed
- Ensure self-bailers are closed
- Secure any items likely to be lost during a capsize
- Check trolley tyres are inflated to ease manoeuvring
- Only hoist sail when head to wind and lower it when not sailing

After use

- Please sponge or hose the boat clean
- Remove bungs and raise bow to drain water out
- Check buoyancy chambers are drained as necessary
- Please try to dry wet sails, but without letting them flap
- Roll sail onto its tube, aligning battens with tube and into its bag.

Return sail to boat-shed

- Re-fit cover and secure tightly to prevent ponding of rainwater, using the halyard to raise the middle of the cover on Green Solo

Please report any problems on the hire record sheet
